## Project Management List

PJTA have been involved in managing a wide variety of projects. The following selections have been chosen to highlight the diversity of our work.

We are a design practice specialising in Architecture, Civil Engineering, Project Management and Surveying. We are a Cambridgeshire consultancy based in St. Ives, but our services are available to Clients throughout the UK.

### The Corn Exchange, St. Ives

**Project: Project Presentation**  
**Client: Private Client**  
**Location: St. Ives, Cambridgeshire**

A number of years ago PJTA joined forces with a local business man in a last ditch attempt to prevent the sale of the St. Ives Corn Exchange. PJTA had worked on a presentation to show how the Corn Exchange could look, if restoration was to take place. The presentation culminated in an animated walk through video of the fully restored structure.

Shortly after the presentation the St. Ives Town Council decided not to sell the building but to renovate it. Although PJTA had no part in the subsequent restoration project, we remain proud to have played a small part in its conception. The St. Ives Corn Exchange is now fully restored and open to all.

## Terminal 5, Heathrow

**Project: Civil Engineering Support**

**Client: Kelo Pipeline Engineering Ltd**

**Location: Heathrow, London**

Kelo Pipeline Engineering Ltd are arguably the leaders in specialised pipeline engineering. They have the knowledge and skill set to tackle all types of pipeline work, but tend to specialise in aviation fuel main. The Kelo workforce are highly skilled and motivated. PJTA are privileged to be able to offer Civil Engineering support to meet the high standards set by Kelo. We also provide a dedicated CAD service that produces all the Company's 'as built' drawings.

Prefabrication

**"PJTA have provided Kelo with first class Civil Engineering support for many years. They understand our core pipeline business and continue to provide a professional and responsive service."**

Pipe Spur Into Valve Chamber

# The City Of Cambridge

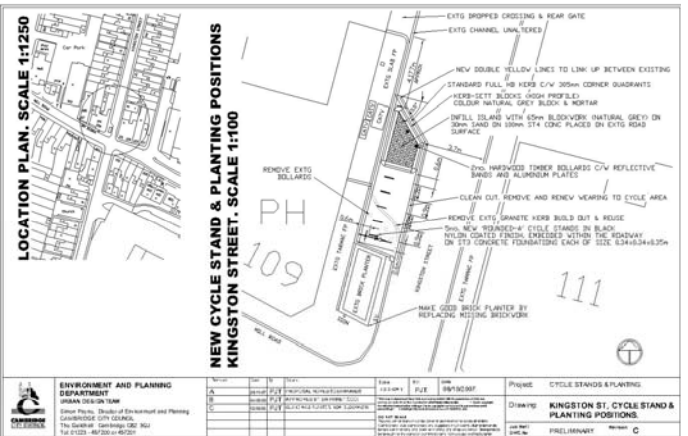

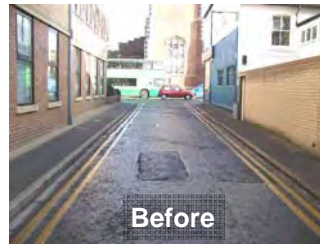

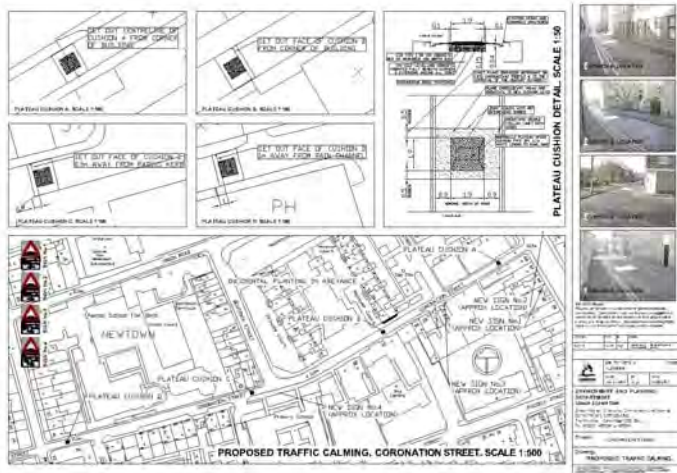

**Project: Engineering Services**  
**Client: Cambridge City Council**  
**Location: The City Of Cambridge**

PJTA have worked and continue to work for a number of Local Authorities. We can provide Engineering Services for a single project or we can provide continuous support on a fixed term basis, as we did here for Cambridge City Council. We have the skills and knowledge to conceive, analyse, design and manage almost any Civil Engineering project.

By outsourcing Architectural and Civil Engineering design work, our Clients achieve a greater flexibility and productivity, without the need to employ additional permanent staff.
